Elite Seed Genetics & Efficient Fertilizer Programs to Increase Yields and Profitability

2025 SEED

NEW! PITMAN: "THE BLUE COLLAR BEAST"

- Early maturity and bearded head
- Strong against Fusarium Head Blight and Barley Yellow Dwarf Virus
- High Test Weight and Yields
- Maximum Value Variety

GROWPRO 348: "NEXT GENERATION"

- Very early maturity and smooth head
- Heavy test weight and high falling number
- Short straw (no growth regulator=faster dry down)
- Dependable broadcast placement

GROWPRO 543: "UNSTOPPABLE"

- Medium early maturity and smooth head
- Top end yield competitor with tall straw
- Broadcast adaptation in PA, MD, and NJ
- High management and high reward

USG 3363: "HEAVY HITTER"

- Medium early maturity and bearded head
- Tall straw and top end disease package
- Can be pushed for top yields
- Dependable broadcast placement

USG 3354: "BIG TIME"

- Medium early maturity and smooth head
- Great defense against leaf rust and powdery mildew
- High yielding in Southern PA and Northern MD
- High management and high reward

ALSO OFFERING SY VIPER, USG 3472, SECRETARIAT BARLEY AND COVER CROP SEEDS

2025 PRICING

	0-100	101-299	300+
PITMAN	\$20	\$19	\$18
USG and GrowPro	\$22	\$21	\$20

ENHANCING EFFICIENCIES FOR SMALL GRAINS

- 1. THREE P's= Potash, Polysulphate, Procote.** For your dry fall fertilizer program, apply enough potash for both your wheat crop and double crop beans. Adding polysulphate and procote zinc is your most cost-effective way of applying sulfur and zinc, which increases fall tillering.
- 2. SEED SOURCE.** Seed treated with fungicide and insecticide will help fight off insects and pathogens. Spread your risk by planting multiple varieties and maturities. Please double check seeds per pound before you drill!
- 3. PHOSPHORUS FLEXIBILITY.** As phosphorus prices have increased in the past two years, keep your options open for alternative applications. Rhizosorb 8-39-0 is an enhanced efficiency fertilizer that reduces tie up in the soil for better root development and plant uptake. If you use UAN in your fall chemical burndown, we can also add 10-34-0 at compatible rates.
